

My entire family listens to K-Love radio at 91.3. This is a "family friendly", station that my 1st grader, my teenager and my husband and I all listen to. I am strongly against the Low Power FM being able to supercede this current FM translator service. K-Love radio provides a station that is positive and encouraging. It has a wide listening audience in my area, as well as, across the country. It would be a shame to lose this station that supports wholesome values to a LPFM station that doesn't. Please do not allow LPFM stations to take priority over current FM translator service. Thank you.
